

Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID03377
Project Name	Project – WEB PHISHING DETECTION
Maximum Marks	2 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

Website URLs are categorized into the following three classes:

- Benign: These are Safe websites that provide normal services to people.
- Malware: These websites which are created by attackers look like normal websites can make use of sensitive contents of people.
- Spam: These websites flood the user's system with advertisements, fake surveys, etc.
